1. **Welcome**
2. **Approval of July 9, 2015 and September 10, 2015 Minutes**
3. **Orange County Watershed Hydromodification GIS Mapping**
Richard Boon, Orange County Stormwater Program

PACE provided the technical basis of policy related to the implementation of "hydromodification" regulation associated with the North Orange County MS4 NPDES Stormwater Permit which covers approximately 550 square miles. This effort involved developing county-wide digital watershed mapping of hydromodification susceptibility. A comprehensive GIS database of digital information for the entire county was accumulated and organized. The data was used to perform an assessment of hydromodification susceptibility utilizing specialized GIS mapping tools and policy oriented screening procedures developed specifically for this study. An overview of the study will be presented.
