Presentation on the State Route 91 Project
From State Route 57 to State Route 55

Meeting of the CAC Bike/Ped Committee
Doug Pekrul, Project Manager and Fernando Chavarria, Community Relations Officer
April 5, 2018
Purpose and Need

➢ Improve capacity and reduce congestion

➢ Reduce weaving and merging between successive ramps at several interchanges

➢ Existing and projected SR-91 mainline peak period traffic demand exceeds available capacity in numerous locations within the project limits.

➢ Congestion due to weaving and merging between successive ramps at several interchanges, which has created bottlenecks.

Comments
Environmental Focus

Community Impacts  Cultural Resources  Farmlands/Timberland  Growth  Land Use

Traffic & Transportation/Pedestrian & Bicycle Facilities  Utilities/Emergency Services  Visual/Aesthetics

Animal Species  Invasive Species  Natural Communities  Plant Species  Threatened & Endangered Species

Wetlands & Other Waters  Tribal  Climate Change
Environmental Process/Next Steps

Initiate Project
GCTA and Caltrans District 12 partnered to initiate the development of the proposed project.

Public Information Meeting
This event is held for members of the community to discuss project details with project representatives.

Circulation
The technical studies will be compiled into the draft ED (DED), available for public review and comment during a circulation period.

Identify Preferred Alternative
The project partners will recommend a preferred alternative.

We Are Here

2015
Technical Studies & Preliminary Design Work
Technical experts conduct preliminary design and technical studies for the Environmental Document (ED).

2016

2017

2018
Public Hearing (Open House Format)
During the public review period, a public hearing (open house format) will be held with project representatives available to respond to questions.

2019
Project Approval
The DED will be revised to include identification and support of the preferred concept and to document public review, including comments received during the circulation period.
