LAKEVIEW AVENUE OVERCROSSING NEW LOOP ROAD

As part of the OC Bridges Lakeview Avenue Overcrossing Project, a new and permanent loop road will open to motorists on **Thursday, May 12**. The new loop road will allow direct access to the business park at the southeast corner of Lakeview Avenue and Orangethorpe Avenue. Access to the buildings will no longer be available via Orangethorpe Avenue. However, while the Lakeview Avenue Overcrossing is under construction, motorists can access the loop road by traveling south on Richfield Avenue, east on Miraloma Avenue, north on Lakeview Avenue and west onto the new Lakeview Commercial Loop roadway. When the Lakeview Avenue Overcrossing opens to motorists in 2017, access to the Lakeview Commercial Loop will be available from both northbound and southbound Lakeview Avenue. Please see the loop road access/detour map on the back of this notice.

During construction of the Lakeview Avenue Overcrossing, traffic control measures will be in place and efforts will be made to minimize impacts to the business park. The Orange County Transportation Authority apologizes in advance for any inconvenience this may cause.
