

Communication System Testing

OC Streetcar crews will be testing the communication system that will support the dispatching system for the future streetcars. To accommodate this work, temporary and localized closures will be in effect along the streetcar route to make room for portable generators. The closures will follow the below schedule:

- November 12, the sidewalk on the south side of Fairview Street at the Pacific Electric Right-of-Way will be closed
- November 14, one southbound lane on Bristol Street will be closed from 5th Street to Santa Ana Boulevard
- November 19, the sidewalk on the east side of Sycamore Street between 4th Street and the parking structure at 201 3rd Street will be closed
- November 19, the sidewalk on the north side of Santa Ana Boulevard between Sycamore Street and Broadway will be closed
- November 21, street parking on the west side of French Street between Santa Ana Boulevard and 5th Street will be closed

The closures will be in effect from 7 a.m. to 5 p.m. for each day. Equipment drop off could begin as early as 5 a.m.

The schedule is subject to change due to inclement weather or unforeseen operational issues. If a weather event or operational issue occurs on the anticipated start date, the closures will be delayed until the conditions allow the activity to start. This work may be loud.

Maps of the closures are below.

Closure Maps

Sidewalk Closure at Fairview St. & PEROW

Bristol St. Southbound Lane Closure

Sidewalk Closure at 4th St. & Sycamore St.

Sidewalk Closure at Santa Ana Blvd.
